

NOTE. The model is from MDF (Medium Density Fibreboard) material that does not handle water very well unless you have used waterproof paint.

This is what you will need to assemble and paint your model:

1. Wood-glue
2. Old newspapers

Now you are ready to start!

1. Put newspapers on the table to prevent marking it with glue or paint.
2. Identify all parts by checking with the assembly diagram.
3. Assemble the model without glue to make certain you know where all parts fit. Disassemble the model and paint the parts (you can also paint it after is assembled).
4. Assemble and glue the parts.
